REAL ESTATE

WEBSITE PROJECT REPORT

PROJECT DONE BY TEAM
MEMBER:-

- SACHIN KUMAR
(12201913)
- ADARSH AGRAWAL
(12201513)
- RISHAV RAJ
(12203509)

Under the guidance :-
MRS SANDEEP KAUR

Project's Main Goal

TO CREATE A RESPONSIBLE REAL
ESTATE WEBSITE FROM WHICH
WE CAN BOOK YOUR DREAM
HOUSE AND ROOM

This part of the project plan helps team members move towards project execution smoothly. Make sure to include:

- How much time each task would take to complete
- Resources assigned to each task
- Deadline for final report approval of the project
- Timeline for the project discussion by the team
- Timeline for everyone to approve of project roles and responsibilities
- Timeline for moving into project implementation
- Timeline for accepting the final project report
- The frequency with which the schedule would be reviewed or updated

INTRODUCTION

ABOUT PROJECT

“Real estate is a form of real property, meaning that it is something you own that is attached to a piece of land.”

- Real estate is considered real property that includes land and anything permanently attached to it or built on it, whether natural or man-made.
- There are five main categories of real estate which include residential, commercial, industrial, raw land, and special use.
- Investing in real estate includes purchasing a home, rental property, or land.
- Indirect investment in real estate can be made via REITs or through pooled real estate investment.

OBJECTIVE

The main objective that the website must pursue is to attract customers who want to sell or purchase.

The Web has become a place where people go in search of not only useful or entertaining information but also goods and services that have real value only in the offline world, which is why real estate website development should now be regarded as a means of encouraging prospective clients to make their purchasing ...

A real estate marketing plan is a written guide for investors to promote themselves and their business. It explains what they're going to do, how they're going to do it, and who will be doing it—and it's the single biggest reason people succeed in this industry; it's also the primary manufacturer of real estate leads.

TECHNOLOGY USED

WE HAVE DEVELOP THIS
PROJECT BY USING THS BELOW
TECHNOLOGY

HTML:-

We create this real estate website by using HTML to layout our pages through different tag or attribute to design our page layout

CSS:-

We create the Real Estate website by using CSS for designing all the part of the website and makes them look beautiful and attractive

FUTURE OF PROJECT

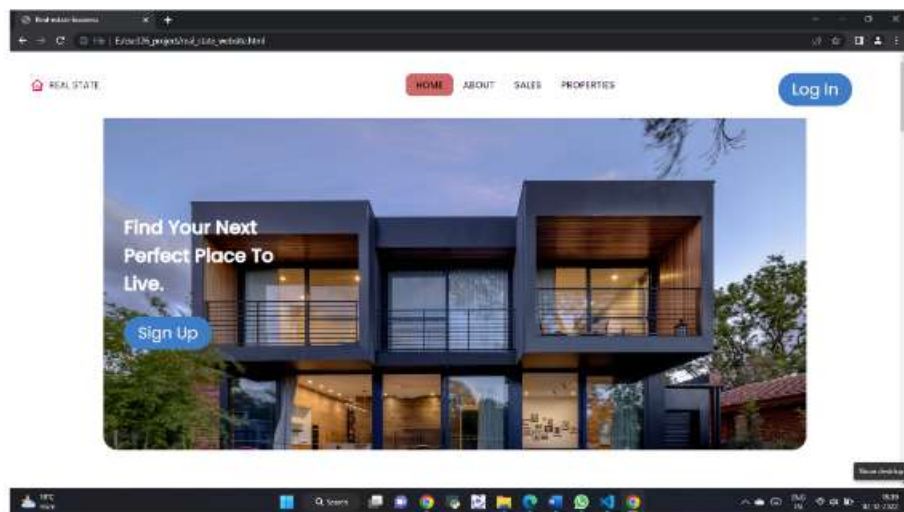

The post-Covid19 ‘normal’, advancements in technology, and the changing homebuyer demographic have created an undeniable impact on the real estate sector. Compelled to implement the modes of digitization and technology such as AI, AR, VR, Data, and Analytics – Big Tech has opened the door for unlocking the potential of the real estate industry. The sector is headed towards an all-inclusive tech upgradation in the form of smart homes and automation via IoT, AI, etc. The very definition of real estate has now changed and is extending beyond the purview of four walls to provide a comprehensive 360-degree experience to the end user.

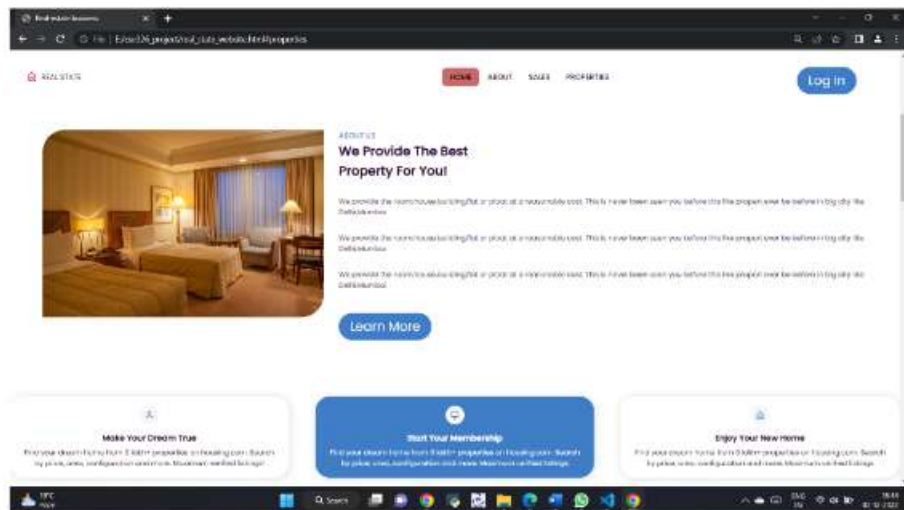

The real estate market in India has seen significant private equity investment in the first half of FY23. Currently worth \$200 billion, the sector is projected to reach \$1 trillion and employ nearly 70 million people by 2030.

CONCLUSION

The Commercial Real Estate Investment Market is a complex system of firms based in different sectors of the industry. The future of companies in this sector are most directly affected and tied to changes in global economic conditions. Depending on what the firms focus on, from Land and Development, Retail Shopping Centers, Industry/Office Space, or Apartments and Multi-family homes, there are many factors affecting their strategy, overall performance, and future.

CONCLUSION

Sustainability is being implemented at all levels within the firms and not just about how the buildings are built and managed but how all levels of the company down to each employee can be involved.

Each of these firms are embracing technology, a changing economic environment and a changing planet. The challenges ahead can lead to opportunities and each firm we researched seems to be making strong decisions to position themselves to meet and excel the future commercial real estate market ahead.

Thank you for taking the time to engage in our project. We hope that you found it worthwhile.

REGARDS:

Sachin Kumar, Adarsh Agrawal, Rishav Raj
